EXPERIENCE

Flowcart: Senior Software Engineer

Aug 2024 - Present

Nairobi, Kenya

- Architected and led frontend redesign of core product, establishing modern React architecture patterns and component design system that improved code maintainability and reduced technical debt.
- Developed and launched a Shopify plugin to support product expansion into the e-commerce market.
- Collaborated directly with the CTO, product designers, and engineers to deliver scalable frontend features in a fast-paced startup environment.
- Drove performance optimization initiatives including migration to Vite build system, implementation of code-splitting strategies, and bundle size reduction through tree-shaking and lazy loading, resulting in significantly faster page loads.
- ReactJS, Typescript, Tailwind CSS, Docker

Yapsody India: Senior Software Engineer

Aug 2023 - Aug 2024

Mumbai, India

- Spearheaded the development and enhancement of the Event Discovery platform using Next.js, implementing numerous features that significantly improved user engagement and satisfaction.
- Managed the website to handle 10k monthly visitors, with traffic peaking at around 15k during weekends, ensuring site stability and performance through collaboration with the Site Reliability Engineering (SRE) team.
- Led a team of developers, providing technical guidance, conducting code reviews, and fostering a collaborative and high-performance development environment.
- Collaborated closely with designers to ensure seamless integration of design elements and worked with project managers to align development efforts with business objectives and timelines.
- NextJS, ReactJS, Typescript, SCSS, Docker, AWS

Riyalto: FrontEnd Developer

July 2022 - July 2023

Gurugram, India

- As an SDE, I developed new Product-specific features using React and its supporting libraries, maintained the front-end repositories. Drove the fronted-end development of the product and was the go-to person for solving any front- end related bugs.
- Lead the team with junior developer and interns to implement new feature developments.
- Collaborated with UX/UI design team to implement new feature developments.
- Helped the company in hiring the interns.
- ReactJS, Typescript, Tailwind, Apollo GraphQL

SignalX: FrontEnd Developer

Hyderabad, India

Jan 2021 - July 2022

- Jr Frontend Developer (Jan 2021- Jan 2022)
- As an SDE, I developed new SaaS-specific features, new Product-specific features, maintained the front-end repositories, and was involved in servicing third-party clients. Driven the fronted-end development of the product and was the go-to person for solving any front- end related bugs.
- Built comprehensive Peer Analysis platform for PricewaterhouseCoopers (PwC), enabling competitive benchmarking with interactive data visualizations and comparison dashboards.
- Developed Vendor Analysis solution for Alvarez and Marsal, creating geospatial visualizations and financial comparison tools for data-driven vendor evaluation.
- Served as technical lead for frontend development, driving feature implementation and resolving complex technical challenges across client projects.
- ReactJS, Rest-API, Material-UI, SCSS

ACHIEVEMENT

Employee of the Month

August 2020, SignalX

- I awarded as employee of the month as appreciation of my work.

WORK PROJECTS

Peer Group Analysis

- Comparing the company with other company in a particular industry and build a dashboard with graphs and comparison boards.
- My Responsibilities are build a dashboard, graphs in frontend.
- This project is worked for PricewaterhouseCoopers(PwC).
- React js, Recompose, Material-UI, Scss

Vendor Analysis

- Comparing the one vendor with other vendor's across the country in financial way and build a dashboard with map and comparison boards.
- My Responsibilities are build a dashboard, making comparsions between vendors in frontend.
- This project is worked for Alvarez and Marsal.
- React js, Recompose, Material-UI, Scss

PERSONAL PROJECTS

Home Seek

Github — Jul 2020 – Aug 2020

- A MERN stack application which focuses on rental process for bachelors and families.
- Used redux architecture for state management.
- Authenticated using Google, FB, and JWT.
- Payment Gateway like RazorPay and for location Google API's are also used.

EDUCATION

Bachelor of Engineering(Civil Engineering), Dr Ambedkar Insitute of Technology

2015 - 2019

Bengaluru, Karnataka
